

PRCC WEIGHT DISCREPANCY CLAIMS

Plastic Recycling Corporation of California reserves the right to amend these provisions from time to time at its sole discretion and will inform the buyer of such amendment at the time of purchase

1) Eligible Claim

A-grade PET bales

- a. If the difference between the in-bound net weight is 2% or less of the net weight reported on the supplier's California weighmaster certificate, buyer will absorb the discrepancy.
- b. If the weight discrepancy is greater than 2% of the net weight reported on the supplier's California weighmaster certificate, and both parties provide certified, printed weight tickets, the weight difference will be split three ways between the buyer, supplier and PRCC. The unit price will be the PRCC container sales price at the time of sale.

B-grade PET bales

- a. If the difference between the in-bound net weight is 4% or less of the net weight reported on the supplier's California weighmaster certificate, buyer will absorb the discrepancy.
- b. If the weight discrepancy is greater than 4% of the net weight reported on the supplier's California weighmaster certificate, and both parties provide certified, printed weight tickets, the weight difference will be split three ways between the buyer, supplier and PRCC. The unit price will be the PRCC sales price at the time of sale. The unit price will be the PRCC container sales price at the time of sale.

2) Documentation

Supplier and buyer must provide certified, printed weight tickets from an identified, reputable facility. If the supplier's weight ticket is handwritten, the supplier will absorb the full discrepancy. If the buyer's weight ticket is handwritten, claim will be rejected.

Buyer shall provide all applicable weight conversions. Buyer shall provide an in-bound bale count.

3) Timing

Claims must be submitted to PRCC within 45 days of the laden vessel departure date from CA port.
